*You are the principal in your life.
There is nothing you can believe in
more than your own being.
Sufism is the inner research to find
this being called you.*

Professor Nader Angha

Sufism

Sufism teaches us that all knowledge is humanity's legacy, but that one does not receive it until it is fully experienced in one's own life time, the reality of the message of each prophet will never be known. Sufism is the essence of the prophets' teachings. It is the way of the prophets. It has existed since the beginning of human history, for its seed lies within every human heart¹.

Harmony

If one can manage to harmonize with his existence, he can be certain that his heart's will, his prayer and his pure intentions are answered².

<i>Revelation</i>	2

Reality is no based on comparison and imagination. In order to comprehend the vastness of existence, something as vast as existence is required— something beyond brain.

Professor Nader Angha

Revelation

The language of revelation is specific and special and is not commonly understood by people. It is only comprehensible to those who have re-cognized “cognized again”, and have experienced the teachings and training in the field of revelation.

Furthermore these teachings are not in the form of classical teaching systems, but are conveyed from the master to the student, inwardly and from heart to heart respectively³.
